About College

Government Degree College Dehar is an emerging educational institution that provides a platform to students from both rural and urban backgrounds. While currently catering to local needs, the college is steadily expanding its reach with the aim of becoming an excellent centre of learning. It takes pride in offering significant opportunities to girl students, who form the majority of its strength.

Despite being housed in a government school building and facing infrastructural constraints, the institution is growing under the dynamic leadership of Dr. J. P. Singh and a team of well-qualified, dedicated faculty. The college is committed to fostering learning opportunities for students and scholars of all disciplines and actively encourages outreach programmes, research, and co-curricular activities.

Concept

In today's world, characterized by environmental uncertainty, climate change, industrial growth, and geopolitical tensions, disasters—both natural and human-made—have become more frequent and devastating. These events test not only infrastructure and governance but also the social, economic, psychological, and cultural fabric of societies.

Effective disaster management requires more than just technological or administrative interventions. It calls for a multidisciplinary approach—where science, policy, literature, economics, and education converge to strengthen preparedness, mitigation, and recovery.

This conference provides a collaborative platform for scholars, researchers, educators, and professionals to discuss evolving paradigms and holistic strategies in disaster management.
